

BOOTSTRAP™ ——— We help you launch.

Bootstrap your business in partnership with Millennium Space Systems. Our Bootstrap™ program offers a rapid, affordable turn-key solution for qualified partners. We complement your entrepreneurial vision with our demonstrated low-risk, high-performance space systems.

Whether you need a precision-pointing spacecraft, or an entire integrated space and ground system, Millennium supports you with technical rigor and solid execution—based on our experience delivering space systems to the most exacting customers. Millennium offers mission analysis, spacecraft, payloads, launch, ground segment and operations tailored to bootstrap your business.

Realize your dream

- UNDER ONE YEAR TO MARKET
- REDUCED CAPITAL COSTS
- INCREASED RETURN ON INVESTMENT

BOOTSTRAP™ Program Menu

- **SPACECRAFT** Start with our ALTAIR™ Software Defined Satellite™ package, which includes precision-pointing bus, interface tailoring, payload integration, and system environmental test.
- **MISSION** Complement your expertise with Millennium's decades of detailed mission analysis, mission planning, and systems engineering experience.
- **PAYLOAD** Bring your own payloads or we can tailor our state-of-the-art payload technologies to implement your mission.

- **LAUNCH** The canisterized ALTAIR™ satellite and ship-and-shoot logistics enable International Space Station, dedicated, and ride-share launches from LEO to GEO.
- **GROUND** ALTAIR™ supports a wide range of ground systems. Whether you need dedicated ground stations, commercial services, or compatibility with your own solution, ALTAIR™ is ready.
- **OPERATIONS** Our seasoned satellite operators are available to support training, commissioning, routine maintenance, or everyday management of your space-based assets.

BOOTSTRAP™ ROUND 1 IS ON. ARE YOU READY?

Submit your one-page business plan and we'll help you bootstrap your business in under a month. Our ALTAIR™ Pathfinder satellite was deployed from the International Space Station (ISS) on May 17th, 2017 and continues its key technology demonstration mission.
